

# Adriatic Sea - Yacht Support

... offering comprehensive superyacht services

# WorkSpace

YachtsUnlimited<sup>TM</sup>, GFC Shipping S.r.l. Port Agents, Via Lazzaretto Vecchio, 9, 34123 TRIESTE

# Mission

- Our purpose is threefold:
- to provide comprehensive support to all superyachts visiting the Adriatic.
- to provide project support for refit, repair and new building projects.
- to provide innovative products to the maritime industry in the Adriatic.

# Our Objectives

We have established close ties to all marinas, maritime authorities, and marine related services in the Adriatic Sea to be able to give yacht owners and their yacht managers/Captains the support they need! We assure top quality and timely services from arrival until you leave the area. Our global service network will add further quality and quick turnover for complicated repairs and engineering solutions. Our specialists hail from all parts of the world and bring to the area a wealth of experience that is unprecedented in the industry! One other aspect of our activity is the multi-lingual support that not only considers the business culture in the different countries but that of our clients!

# Approach

## Not Agents

We are not just acting as agents but give active 'hands on' support to both the yacht owner's side and the suppliers side, such as marinas, shipyards and their sub contractors. We are actively working with our clients planning their projects and seeing it through to conclusion 'within time, within budget' using our own experienced engineers and yacht managers.

## All Aspects

We cover all aspects involved in yacht operations in the Adriatic and also assure a good after sales service for our clients. Our reach is global! For the local superyacht repair & construction industry we are the link to develop their businesses further and improve specific skills and provide training to their managers to achieve better results.

## Performance

We offer modern products to our clients that improve fuel efficiency of marine engines of all types, reduce emissions, and/or are in general more sustainable than the products or machinery they replace. We can offer complete fleet solutions in this field and also work towards the goal to exceed upcoming regulations.

# Facilities

Our services are offered in various locations and include the following facilities

Marina and dock spaces for yachts up to 180m

Shipyard facilities and dry docks for all sizes

Sliplifts to 1500t

Syncrolift/Hydrolift facilities

Large fabrication and modern paint sheds

Plasma cutters, CNC machines, hydrojet blasters, etc.

Deepwater anchorages in sheltered waters in various natural harbours with personalized service and guardianship.

Project office spaces (in some locations) with high speed internet, gym, etc.

Hardstand areas for short and long term storage

# Services

Marina Bookings & Clearance  
Dry Dock & Dockside Repairs  
Lay-up Facilities ashore/afloat  
New Building & Conversion  
Complete Refits  
Emergency Repairs  
ISM/ISPS Management  
Customs Agency  
Bunker Services  
Car & Truck Rentals  
Provisioning & Ship Agency Services  
Crew Travel & Accommodation  
Spare Parts  
New Products/Green Products

# Training

## ...going the extra mile

In collaboration with the Nautical Schools in several locations we can offer training sessions for yacht crew. We can arrange for STCW upgrade courses for deck & engine crew (in English) that probably will coincide with dry docking or dockside repair periods.

Without any further expense we offer as independent consultants to assess the client's yacht with our own engineers to suggest measures to improve efficiency and economy of the operations and check on crew status/motivation, etc.

“

Simplicity is the ultimate Sophistication, Leonardo da Vinci
